

# App: Pocket Sofà

Pocket Sofa is an application for iOS and Android systems, with which you can adjust all the functions of your armchair and/or sofa through your Smartphone.

With Pocket Sofa, you can adjust the position of your armchair and/or your sofa seat, in all its possibilities of movement (footrest position, seat depth, backrest angle and head rest position). Like that you can adjust your position in any situation: work, TV viewing, listening to your favourite audio, moments of simple relaxation or deep rest.

You can choose whether to use one of the many preset ergonomic positions or you can be free to search your favorite position, to store it and to retrieve it whenever you like.

All options are very personal, to respect your unique and unrepeatable being.
